With Mission Control, we are creating an engaging, community-focused and entertaining extension to Alien Worlds.

We see you. And you are “ore”-some!

Our goal is **make Alien Worlds a long-term success**. But who are we even? Many of you have seen Pesti, Izay and Shrimp in Discord or Telegram already, but for those who do not know us, here is a quick introduction:

Pestilentia

Initiator and Co-Founder of the Naron Reward Program that ran for over a year. He joined Alien Worlds in April 2021. Pestilentia made waves when he was the first player to hit the highest NFT Point rank in Alien Worlds and he is in the lead in the race for the top landracting.

Izay

Co-Founder of Mission Control. He joined Alien Worlds early and has been a developer on the WAX Blockchain for multiple years already. Without his skills, we would not be where we are right now.

Shrimp

The other Co-Founder of Mission Control. Just like Pestilentia, Shrimp joined Alien Worlds in April 2021. He is a Smart Contract developer on WAX and passionate about Blockchain Gaming.

To achieve our goal of making Alien Worlds a long-term success we will continue to build the Mission Control platform.

- Introduce more utility for TLM & Alien Worlds NFTs
- Reward honest players for playing and positive engagement

- Marketing and Promotions to bring new players to Alien Worlds
- Expand the Metaverse by fun and engaging experiences
- Engage and Inform the Community
- Provide useful tools and services for all players

As many in the community already suggested, one of the first steps to achieve our goals will be combining all existing parts into one platform. The Miners Union will all be featured inside the Mission Control website with a common interface, login and sign-up. As you might imagine, this is not a quick task and will take time.

We have quite a few more features and extensions planned, which we will talk about in more detail in the future. We can however already reveal what the next update will bring:

Since one of the most used Tool Calculators recently went offline, we have had many requests to build something like this to fill the void. So this is exactly what we are doing. So make sure to keep your eyes and ears open for more updates.

Community Feedback is extremely important to us. If there is anything you are really missing in Alien Worlds, please let us know in the Mission Control Discord. Maybe its something we can take care of.
